

Aip-cp 2017 troubleshooting

[iint already defined issue](#)

If you are experiencing the issue mentioned below:

```
("C:\Program Files\MiKTeX 2.9\tex\latex\amsmath\amsopn.sty")  
  
! LaTeX Error: Command \iint already defined.  
   Or name \end... illegal, see p.192 of the manual.
```

```
See the LaTeX manual or LaTeX Companion for explanation.  
Type H <return> for immediate help.  
...
```

```
1.635 ...d{\iint}{\DOTSI\protect\MultiIntegral{2}}
```

```
? |
```

Please add these four lines after documentclass line:

```
\let\iint\undefined  
\let\iiint\undefined  
\let\iiiint\undefined  
\let\idotsint\undefined
```

It should look like this:

```
1 \documentclass{aip-cp}  
2  
3 \let\iint\undefined  
4 \let\iiint\undefined  
5 \let\iiiint\undefined  
6 \let\idotsint\undefined  
7  
8  
9 \usepackage[numbers]{natbib}  
10 \usepackage{graphicx}  
11 \usepackage{hyperref}  
12 \usepackage{amsmath}  
13  
14 % Document starts  
15 \begin{document}  
16  
17 % Title portion  
18 \title{The Title Goes Here with Each Initial Letter Capitalized}  
19  
20 \author[aff1]{Author's Name\corref{cor1}}  
21 \address[url]{http://www.aip.org}  
22 \author[aff2,aff3]{Author's Name}  
23 \address{anotherauthor@thisaddress.yyy}  
24
```

Adding these lines will solve [iint already defined issue](#)

Kind Regards

ICNAAM Organizing Committee
